Proven track record in optimizing reporting processes and promoting effective data-driven strategies across diverse teams.

## Work Experience

### **Client - HSBC**

04/2025 - Current

- Streamlined data transformation processes, improving business intelligence reporting.
- Performed report migration from XR2 application to Power BI, ensuring seamless transition.
- Facilitated cross-functional collaboration using Power BI to ensure seamless report integration.

### **Client - BlackRock**

08/2021 - 03/2025

- Managed Power BI governance and access at the workspace level to improve data security and compliance.
- Crafted calculated columns and measures utilizing DAX within MS Power BI Desktop environment.
- Developed POCs highlighting MS Power BI functionalities for customer presentations.
- Utilized GIT for code repository maintenance, enhancing collaboration among project teams.
- Implemented advanced Power BI features to enhance reporting accuracy and efficiency.
- Achieved SSRS integration with Power BI to improve reporting processes.
- Generated, published, and scheduled bespoke Power BI reports while ensuring row-level security implementation.
- Optimized report generation processes using Power BI, reducing timelines from 5 days to 1 day.

### **Client - Microsoft**

02/2017 - 07/2021

- Produced stakeholder-specific reports aligned with defined requirements.
- Administered PowerBI governance and access management at workspace level.
- Leveraged SSAS tabular model to establish live connections in PowerBI.
- Streamlined reporting through automation, decreasing manual effort substantially.
