

Kirankumar Yadav

Role: AI/ML Lead Engineer • Email: iamkirankumaryadav@gmail.com • Phone: [+919004967226](tel:+919004967226)

LinkedIn: [linkedin.com/in/iamkirankumaryadav](https://www.linkedin.com/in/iamkirankumaryadav) • Professional Portfolios: [GitHub](#) and [Website](#)

Skills

- **Artificial Intelligence and Machine Learning:** Generative AI (GenAI), MLOps, LLMOps, Prompt Engineering
- **Google AI Build:** Google AI Studio, Google Antigravity, Gemini Agent Platform, Gemini Code Assist
- **Microsoft Infrastructure:** Azure AI Foundry, Microsoft Copilot Studio, Microsoft VS Code, GitHub Copilot
- **Programming and Scripting:** Python, SQL, JavaScript, React, Node.js, HTML, CSS, Markdown
- **Business Intelligence (BI) and Analytics:** Microsoft Power BI, DAX, Tableau, Google Looker Studio
- **Data Engineering:** SQL Server Management Studio, Teradata Vantage Cloud, Databricks Data Intelligence
- **Cloud AI Infrastructure:** Microsoft Fabric, Snowflake AI Data Cloud, Azure OpenAI, AWS Bedrock
- **Generative AI Apps:** Google Gemini, OpenAI ChatGPT, Microsoft Copilot, Anthropic Claude, Perplexity
- **Productivity:** Google Workspace, Microsoft 365, Notion AI, Atlassian Rovo, Salesforce Quip, Slack, and Wrike

Experience

AI/ML Lead: Broadridge Financial Solutions, Bangalore (December 2024 - Present)

- **OnboardGPT:** Led system design and development of an AI-driven onboarding architecture with strategic ownership that streamlined workflows, boosted SME engagement, enhanced conversions efficiency by 80%.
- **Retrieval Augmented Generation (RAG):** Engineered an enterprise Knowledge Management framework using AWS OpenSearch for document ingestion, chunking, embedding generation, and vector storage to build a centralized Knowledge Base, and enable scalable, context-aware AI responses across applications.
- **Generative AI Application:** Applied Generative AI with strategic prompt engineering to enhance onboarding conversion data and content quality, enhancing LLM response relevance, accuracy, and presentation.
- **Snowflake AI Data Cloud:** Leveraged an enterprise grade Snowflake Cortex AI to enable scalable data driven decision making across enterprise workflows and automated decision intelligence across business processes.

Senior Data Science Specialist: LTIM, Bangalore (February 2024 - November 2024)

- **FOSFOR (Product by LTIM) Enterprise AI Cloud:** Led implementation and application of [Fosfor Decision Cloud](#) suite enabling advanced decision intelligence following the Enterprise Responsible AI Governance.
- **Data Designer (Data Engineering):** Implemented a comprehensive DataOps platform, that streamlined and optimized end-to-end data pipelines, improving data quality and processing efficiency by 90%.
- **Insight Designer (Machine Learning Operations):** Delivered a no-code/low-code platform, accelerating model development, training, and deployment for Data Scientists and Machine Learning Engineers.
- **Decision Designer (Advanced Augmented Analytics):** Deployed a decision intelligence tool enabling Business Analysts to derive actionable insights via natural language search, with future RAG integration potential.

Senior Data Scientist: Tata Consultancy Services, Bangalore (May 2021 - January 2024)

- **Apple Inc. with SAP Global System Platform:** Directed the MLOps team, leveraging SAP AI Core (SAP Business AI Data Cloud Portfolio) to drive strategic process optimizations that improved operational efficiency by 75%.
- **SAP Platform Integration:** Associated with the SAP Business Technology Platform and Business Application Software Integration Platform teams, to ensure seamless data operations and migrations across [SAP Data Intelligence \(SAP DI\)](#) Platform, Data Lake, and SAP HANA Cloud Sidecar, achieving zero data integrity issues.
- **Project Management Optimization:** Delivered 55% faster project outcomes by deploying AI-powered Wrike.

Apple Inc. Business Process Reengineering (BPR): Business Excellence and Optimization

- **Label Validation Automation:** Pioneered automated label validation for barcode, QR code, data matrices, artwork, and marcom texts on Apple product labels, reducing labelling errors by 70%.
- **Object Detection Pipeline YOLOv5:** Deployed an auto-train pipeline using YOLOv5 for seamless label detection, decoding, and sequencing of the apple products, improving the detection accuracy by 60%.
- **Model Training and Iterative Improvement:** Enhanced detection accuracy by 30% through iterative training on extracted label clips, driving continuous improvement of the object detection pipeline.

Hewlett Packard Enterprise (HPE): Supply Chain Analytics and Insights (Advanced Analytics)

- **Exploratory Data Analysis (EDA):** Led data cleansing, transformation, visualization, and feature engineering efforts, resulting in a 70% improvement in data accuracy and processing efficiency.
- **Power BI Dashboards:** Designed interactive dashboards to monitor demand-supply gaps, SKU shortages and line of balance across AMR, EMEA, and APAC regions, enhancing decision-making precision by 80%.

Senior Data Analyst: Bluechip Corporate Investment Centre, Mumbai (October 2017 - May 2021)

- **Financial Data Analysis and Collaboration:** Partnered with [Accord Fintech](#) and [ICRA Analytics](#), enhancing data quality by 60% and improving the financial analysis accuracy by 45%.
- **Market Analysis Integration:** Enabled seamless integration with Bluechip Corporate Investment Marketing team, increasing market analysis accuracy by 25%, and empowering more informed decision-making.

Leadership and Activities

Digital Productivity Specialist

- **Workflow Optimization:** Leveraged Google Workspace, Microsoft 365, Apple iWork, Atlassian (Confluence and Jira), and Salesforce (Quip, Slack, and Wrike) to enhance workflows, boosting the overall efficiency by 60%.
- **Product Innovation:** Engaged in early access programs (Experiments, Early Access, Public Previews, and Beta Versions), providing actionable feedback on features, usability, and accessibility for applications and OS updates.

Corporate Social Responsibilities

- **Global Industry Conference Participation:** Google I/O Connect, Google Cloud Next, Microsoft Build, GitHub Universe, AWS re: Invent, Apple WWDC, Samsung SDC, CES, Snowflake Summit, Databricks Data + AI Summit, Adobe Summit, and Dreamforce to stay current. Gained productive insights to drive emerging technologies.
- **Diverse Event Coordination:** Directed technical workshops and new product Introduction events to drive impact.

Education

- **Postgraduate Certification:** Data Science and Artificial Intelligence, Mumbai (2020)
- **Bachelor of Engineering (B.E.):** Computer Engineering, University of Mumbai (2017)
